

AI Career Report

ATS Score: 83/100

Detected Skills:

excel, github, machine learning, matplotlib, pandas, power bi, python, sql, tensorflow

Top Job Recommendations:

Data Scientist (85.25%)

Junior Data Scientist (84.06%)

Data Analyst (75.60%)

Product Analyst (73.71%)

Business Analyst (73.12%)

Missing Skills

- numpy
- scikit-learn
- seaborn

Learning Roadmap

- Master NumPy through hands-on numerical computing and vectorized performance exercises.
- Build, validate, and compare ML models using scikit-learn pipelines and metrics.
- Use Seaborn to explore data patterns with statistical visualizations and heatmaps.
- Practice core data science workflows: feature engineering, model validation, and interpretability.
- Learn Statistics

Recommended Projects

- Numerical Data Analysis Project
- Feature Engineering with NumPy
- Supervised ML Model Project
- Model Comparison and Tuning
